Article 4

Examining Commission and Selection Procedures

The Commission is appointed by the Department Council and made up of three professors in accordance with the provisions of article 6 of the Regulations.

Should a commission member be replaced during the course of the procedure, everything done up to the time of that replacement shall remain valid and effective pursuant to the principle of conservation of legal acts.

The Commission will appoint one of its number as the Chairperson and another as the Recording Secretary.

The comparative evaluation is informed by the principles of article 7 of the Regulations as supplemented and specified below.

The selected professor must have conducted research at both national and international levels, as demonstrated by:

- proven scientific research of high standards and publications in leading academic journals and significant collective works of national and international relevance related to the academic discipline field GIUR/02-A, with a focus on the continuity of this research, particularly over the last 5 years;
- active participation in the academic debate within the relevant scientific community (participation in national and international conferences, invited talks at conferences or prestigious universities);
- formal appointment to teaching positions, visiting scholarships, or visiting professorships at prestigious schools, universities, and research institutions, including international ones;
- proven involvement in editorial boards of leading national and international journals and in program committees for significant national and international conferences;
- principal investigator and/or participant in highly qualified research programmes and projects funded by the Italian Ministry of University and Research (e.g., Rita Levi-Montalcini Programme, FIS), the CNR, the European Union (e.g., ERC Grants, Marie Skłodowska-Curie), or other leading research institutions, demonstrating the excellence and impact of scientific research.

The selected candidate will be evaluated based on their teaching experience – including in English – both at the university level (undergraduate and graduate) and post-university level (doctoral and master's programs), as well as in supervising undergraduate and/or graduate and Ph.D. students in subjects relevant to the academic discipline field and to the related teaching and research activities. The comparative evaluation of the scientific production will also take into account the relevance of the journals and the editorial placements within their respective academic discipline field. The comparative evaluation of teaching and research activities carried out at highly qualified Italian or foreign academic institutions shall take into account the relevance of the positions held and the qualifications associated with them.

In addition to the candidate's academic prowess the evaluation will also take account of the linguistic skills necessary because of the University's multilingual character and the teaching needs for courses taught in foreign languages. To this end candidates might be called upon to hold a seminar on a topic of their choice, in English, also in presence of students. The Commission will summon candidates for the holding of the seminar subject to giving them at least 20 calendar days' notice.

The publication of the notice of convocation to the seminar on the Luiss Guido Carli website will have the value of notification for all participants in the competition, without the obligation of any further communication. Notice of the publication may also be given to the e-mail address indicated by the candidates in the application. Luiss Guido Carli assumes no responsibility for non-receipt or non-reading of the e-mail. It will, however, be the responsibility of the candidates to keep informed by consulting the website, in the section dedicated to the competition, to find the necessary information.

In case of absence from the seminar, the participant automatically renounces the comparative evaluation.

At the end of the proceedings the Commission will come to an overall judgment on each candidate and will compile a ranking to be sent to the Department Board.

Article 5

Duration of Selection Process

The Commission will conclude its work within four months after its appointment. The Rector may extend once and by two months at most the deadline for the conclusion of the procedure for stated reasons given by the Commission Chairperson.

Taking account of the Commission's judgment, teaching needs and the profile and functions specified in the announcement, the Department Board will establish, by reasoned and favourable vote of the absolute majority of first-level professors for the recruitment of first-level professors and absolute majority of first and second level professors for the recruitment of second-level professors, a ranking of names for submission to the Rector. On the basis of the deliberations of the Department Board, the Rector will make a proposal to the Executive Committee. The Executive Committee will decide on the recruitment. The Rector will issue a decree recruiting the professor.
